REGENERATION AND RESILIENCE IN URBAN AND SPATIAL PLANNING

Methods and case studies

The aim of the course is to provide evidence on the approaches used in urban and spatial planning for the regeneration and resilience of urban and rural areas. The course aims to investigate the tools used on different scales through the division into specific case-study applications. The course is divided into 4 lessons:

27/06/24
h 10-13

Assessment approaches to support urban regeneration strategies in Emilia-Romagna Region

Elisa Conticelli

Alma Mater Studiorum – University of Bologna

02/07/24
h 10-13

Rural regeneration in Italy and Europe. Bando Borghi and RURACTIVE project

Claudia De Luca

Alma Mater Studiorum – University of Bologna

09/07/24
h 10-13

Regeneration and resilience of historical cities and cultural landscapes. SHELTER and RescueME projects

Angela Santangelo

Alma Mater Studiorum – University of Bologna

15/07/24
h 10-13

Regeneration of specialised areas. Industrial areas and small port cities

Alessandro Bovo

University of Padua
