FUTURE OF AUTOMOTIVE FOR INTELLIGENT MOBILITY

Winter School MUNER - 2024 edition

“Vehicles of the future will be very different from those running along our roads today. We are approaching a revolution that will make mobility an issue of flexibility, sustainability and intelligence, while still demanding speed, reduced weight and robustness.”

November 18 – November 23, 2024

Discover more 

MAIN TOPICS

- Advances in industrial engineering (Materials, Manufacturing, Powertrains, Energy storage and Sustainable Fuels)
- Advances in Information and Electronic engineering (Sensors, Connectivity, Power electronics, Computing, Artificial intelligence)

OFFER

Lectures, workshops and seminars: the Winter School aims to further train outstanding technical profiles and connect them with the MUNER partner companies.

TARGET

Students who have pursued or are pursuing specialized studies, preferably PhDs, in the automotive field or on the school's major topics.

LOCATION

On site in Bologna, at the Department of Industrial Engineering, and in the MUNER companies and universities that will be involved in the School.

All activities will be held in English.
