

MISSION WITHIN A MISSION

(last updated April 2026)

It is possible to arrange a mission within the framework of another mission already in progress (for example, a research stay in the Netherlands [mission 1] and participation in a conference in Germany [mission 2]).

To this end, an additional travel segment must be entered into the existing mission.

This procedure must be carried out **at the same time** as the submission of the authorization request for the first mission.
