AULA MESSIERI

Relazione scientifica annuale - Dottorandi in Scienze Veterinarie CURRICULUM SCIENZE CLINICHE E SANITÀ ANIMALE

14.00 - 14.15

Dott.ssa Erika Esposito - 39° ciclo *Curriculum Sanità Animale*

Environmental surveillance of antimicrobial resistance (AMR) through the study of resistance patterns in commensal coliform strains isolated from wild animals.
Who is the best bioindicator in wildlife?

14.15 - 14.30

Dott.ssa Francesca Spaccini - 39° ciclo

Intraoperative monitoring of hemodynamic parameters in dogs undergoing general anaesthesia with isoflurane.

14.30 - 14.45

Dott. Stefano Zanardi - 39° ciclo

Sentinel lymph node mapping, comparison between different techniques.

14.45 - 15.00

Dott.ssa Emilia Attolini - 40° ciclo

The use of mesenchymal stromal/stem cells secretome in In vitro embryo production.

15.00 - 15.15

Dott.ssa Aurora Mannini - 40° ciclo

Monitoring of equine sick patients: assessment of autonomic nervous system activity through HRV and infrared thermography, with emphasis on stress, pain, and inflammation.

15.15 - 15.30

Dott.ssa Laura Piredda - 40° ciclo

Ecotoxicological analyses of deep-sea Rabbitfish (*Chimaera monstrosa*) sampling as sentinels of environmental pollution in the Mediterranean.

15.30 - 15.45

Dott.ssa Elisa Pizzi - 40° ciclo

Preliminary analysis of minimally invasive techniques for the main urological diseases in dogs and cats.
