

Seminario Pubblico Sull'Interazione Tra Tettonica-Clima ed Erosione a cura di *Peter van der Beek* (Università di Potsdam)

Late Cenozoic Climate, Tectonics, and the Topography of Mountain Belts

Il **16 Settembre** alle ore **14.00** (durata ca. 1.30 hr)
Presso l'**Aula 2** del BiGeA,
Via Zamboni 67 - Bologna

Prof. van der Beek is the current **EGU President**, he graduated and did his PhD studies at the Vrije Universiteit, Amsterdam. In 2006, he became full Professor in Grenoble (France). In 2020, he moved to Potsdam where he set up the first European $^4\text{He}/^3\text{He}$ laboratory to study the effect of glacial erosion on mountain topography. Peter is interested in the links between tectonics, climate, erosion and relief development in mountain belts (Alps, Himalaya and elsewhere).
